## Sector

- Human Resources Management, IT

## Solution

**RFSens** provides Industrial monitoring for a harsh environment, predictive equipment diagnosis, and automation. Our solution is the real-time monitoring, and predictive diagnosis of high/medium/low voltage equipment, which reduces emergency and fire risk and can be applied in the smart Grids and Industrial Internet of Things. Our proprietary technology based on fully passive (without batteries and active circuits inside) wireless sensors. Such sensors could be installed on the HV conductors, in the generator and turbine.

## Company Background

The Scientific and Technical Center **RFSens** is an innovative company that has been a Skolkovo resident since 2015. **RFSens** is one of the 5 top Russian startups that represented Russia at the G20 Innovation League. In partnership with the investment funds and development institutions, the company is implementing and scaling up innovative systems for diagnostics and monitoring technological business processes.

## Technology Readiness Level

- Ready for implementation

## Sector

- IT

## Solution

Sales Chain is a dynamically developing innovative IT platform that guarantees fast payment of remuneration and has the most convenient service that does not require paperwork. The platform is easy to use as registration is simple and quick, moreover, it's convenient to send and monitor applications with the Bank. Also the platform offers high reward for transactions in banks: up to 3% on hands.

SalesChain

## Company Background

SalesChain is an agent and partner sales generator that combines the entire cycle of work with Agents / Partners, from onboarding an Agent / Partner and transferring an API request to the Customer's CRM, to paying remuneration and taxes for the Agent. Possessing advanced expertise in the field of building sales through a network of Agents, the company has created a convenient solution for developing the business of Partners (Customers).
